Cast Iron Welding & Metal Stitching Repairs

## Industrial Paper Roller

When we were contacted by a company urgently needing our expertise in Metal Stitching to repair a crack which had appeared in one of their large mechanical paper rollers, we were ready!

They have been making paper on the same site since the 1700's, and as experts in manufacturing high quality artists papers they needed to continue their production and minimise the downtime of the machine.

Our engineers travelled to Somerset to carry out emergency repairs to the paper roller by way of our stitching procedures for cast iron. We then ground up all stitching repairs to match existing shape, and fully crack tested.

After the stitching and inspection process, we cleaned back the profile to match seamlessly, ready for the roller to continue its service within the mill —as you can see from the last picture!

*Yet another economical repair!*

For any Emergency Industrial Repairs, contact us for a free initial survey/ quotation.

- Free Survey/Quotation
- Metal Stitching
- Full Crack Detection
- Casting of Parts if Required
- 24 Hour Emergency Service
- All Work Guaranteed

*Breathing new life into  
damaged cast iron components*
