Cast Iron Welding & Metal Stitching Repairs

1928 Dennis Lorry Block

We were approached by a customer who had a badly cracked cylinder block on his 1928 Dennis Lorry and requested we carry out metal stitching repairs on site.

As the block was easily accessible for on site repairs, our Engineer set about the task over two days—cutting out the damage then fitting a new “patch” using our lock and pin procedure.

This repair has now given our customer a reconditioned block with many years of service, enabling the lorry to be enjoyed for many generations to come!

For any Metal Stitching Repairs contact us for a survey/quotation. On site repair service available.

- Metal Stitching
- Full Crack Detection
- Full Pressure Testing
- Machining Facilities
- Fixed Cost Repairs
- 12 Months Guarantee
