Cast Iron Welding & Metal Stitching Repairs

1933 Aston Martin 'Le Mans' Block

As you can see from the first two photographs, a damaged block was brought to us by its owner along with a number of broken pieces to jigsaw back into position!

Welding repairs were undertaken by way of our Lloyds approved fusion welding procedure for cast iron, followed by grinding to shape; shot blasting; pressure testing; crack testing; and finally a coating of red oxide primer.

The "Le Mans" was a 2/4 seat sports car made by Aston Martin between 1932 and 1933 making the cars exclusive - only 130 were produced. The cars were long, low and immediately recognisable by their unique radiator style and had great character making all the appropriate mechanical noises that characterised Aston Martin.

When the repaired block was collected by our customer, the team were praised for doing "a magnificent job" of giving him a reconditioned original block with many years of service, enabling the vehicle to be enjoyed by future generations to come!

For any veteran and vintage repairs, please contact us for a survey/quotation.

- Full Pressure Testing
- Full Crack Detection
- Fixed Cost Repairs
- Lloyds Welding Procedures
- Machining Facilities
- 12 Months Guarantee
