Cast Iron Welding & Metal Stitching Repairs

## Coalbrookdale Garden Bench

We were contacted by a local hall with a rare 19<sup>th</sup> century Coalbrookdale “Waterplant” cast iron garden bench in need of repair and renovation. The front support bar had completely broken through, and the oak slats were looking pretty rotten - it was certainly in need of a facelift!

The bench was brought into our Derbyshire workshop, where it was inspected for any other defects, before being stripped of the oak slats and any old paint. Welding repairs were undertaken by way of our Lloyds approved fusion welding procedure for cast iron, and then ground to shape, before shot blasting, and painting of a grey oxide primer, undercoat, and a top coat of Deep Brunswick Green. Then came the fitting of the new oak slats, with a coat of protective garden furniture oil applied, before the bench was returned to its quiet area of the garden. The last pictures show what a difference the facelift has made!

For any Architectural Restorations, please call us for a survey/quotation.

- On Site Inspection/Quotation
- Lloyds Welding Procedures
- Full Crack Detection
- Full Shot Blasting
- Recasting if needed
- Painting as Required
- 2 Year Guarantee

*Breathing new life into  
damaged cast iron components*
