Cast Iron Welding & Metal Stitching Repairs

## Flap Outlet

We were contacted by a company that needed our expertise in onsite stitching repairs to a cracked Flap Outlet for a flood defence system in Lancashire and the repairs needed to be carried out in one day!

Our engineers travelled to site and carried out the repairs by way of our approved metal stitching procedures, followed by grinding up to the correct profile to match existing shape, then fully crack testing. After the stitching and inspection process, the repaired area was given a coat of primer, before the flap was reinstalled ready to continue its job along the flood defence.

*"Many thanks for the work on site yesterday, the finished job looks great".*

For any Industrial Repairs contact us for an initial survey/quotation.

- Free Survey/Quotation
- Metal Stitching
- Full Crack Detection
- Casting of Parts if Required
- 24 Hour Emergency Service
- All Work Guaranteed

*Breathing new life into  
damaged cast iron components*
