

Slinden Services Ltd

Cast Iron Welding & Metal Stitching Repairs

MAN B&W L8 28/32H Head

Slinden Services Limited have repaired and reconditioned many different types of Marine Cylinder Head including MAK, MAN, Diahatsu, Volvo and Niigata.

This MAN head was in need of welding repairs to inlet and exhaust ports due to deterioration/corrosion.

These areas were ground back to sound material and subsequently welded using our Lloyds approved welding procedure for cast iron. An NDT inspection followed to ensure sound repairs which were then machined back to correct tolerances and spare parts were fitted, before a thorough cleaning and painting ready for dispatch.

For any Marine Cylinder Head repair, contact us for a survey/ quotation.

- 
- Full Pressure Testing
 - Full Crack Detection
 - Fixed Cost Repairs
 - Lloyds Welding Procedures
 - Machining Facilities
 - Fitting of Spares
 - Classification Certificates
 - 12 Months Guarantee
