Cast Iron Welding & Metal Stitching Repairs

Ornamental Garden Urns

Another historical project was these lovely ornamental cast iron garden urns.

Having spent years outside in all weathers, they were looking a bit worn, with holes, cracks and damaged edges to the bowls, and two of the mounting points had completely rotted through.

They were all shot blasted upon arrival before inspection, to check for defects, followed by welding repairs by way of our Lloyds approved fusion welding procedures for cast iron, including repairing of the mounting points as necessary.

All repairs were ground to shape to match correct profile, blasted again, then a zinc phosphate primer was applied, followed by undercoat, and a top coat of the customer's choosing. And finally, transported back to the estate gardens to once more take pride of place!

For any Architectural Restorations, please call us for a survey/quotation.

- On Site Inspection/Quotation
- Lloyds Welding Procedures
- Full Crack Detection
- Full Shot Blasting
- Recasting if needed
- Painting as Required
- 2 Year Guarantee
